

PROTO GREEN™

ENVIRONMENTALLY FRIENDLY PROTOTYPING™

Make your next prototype a **GREENPROTO™** with Capital Advanced Technologies RoHS compliant*, LEAD FREE** products.

Our **SURFGREEN™** Program includes products designed for lead free soldering and feature lead free RoHS compliant construction.

Our **GREENSURF™** Solderable surface finishes offer ecologically friendly options for both prototype and production circuits. Our **PitchGREEN™** Program offers both RoHS compliant standard and custom circuits including SIP and DIP packaging.

When compliant components and solders are used in conjunction with our RoHS compliant products, the user can produce compliant prototypes or production circuits. Even when compliance is not an issue for a specific application the use of compliant products and processes may be desirable from an environmental perspective. Our RoHS compliant standard products are backward compatible with lead based solders when desired.

RoHS COMPLIANT/ LEAD FREE PRODUCT IDENTIFICATION:
Compliant products can be identified by the term(s) RoHS Compliant , LEAD FREE on the packaging. Other terms and logos may be added when appropriate.

* RoHS compliant per directive EC 2002/95
**LEAD FREE 0.1% or less Lead content.
